Baltimore, Jan'y 30. 1881.

To the Commissioner of Health

I was called to Mr Henderson's child on Sat. 29<sup>th</sup>. about 7. 30. P.M. - It had been vomiting. Some six or seven times during the day, when given food - the child looked pale, no heat about head, no fever - no sore throat - no heat about the fanns. - was perfectly conscious, the tongue was coated with white<sup>ish</sup> fur. was lying in the father's lap. - My diagnosis was Gastric irritation from ~~error~~ error in diet - I advised it being put to bed. gave some powder of Ipecacuan. - had 3x tuberculation, and to give nothing but cold water during the night. It died about 6 Am this morning - knowing no cause for death I have reported it as Cause unknown
